Education

Mohanlal Sukhadia University (MLSU), Udaipur Expected July 2026
Bachelor of Computer Applications (BCA) *Udaipur, Rajasthan*

- **Relevant Coursework:**
  - **Programming Languages:** C, C++, Java, Python, PHP, C#, Assembly Level Language.
  - **Web Development:** HTML, CSS, JavaScript.
  - **Databases & Data Handling:** Database Management System (DBMS), Tally, Data Structures using C
  - **Productivity & Tools:** Advanced Excel, VS Code

Experience

Data Visualization with Power BI May 2025
Self-paced Learning and Practice *Self-learning*

- Practiced creating dynamic dashboards and data visualizations using Power BI on various datasets.
- Focused on transforming raw data into actionable insights through effective visual storytelling.

Soft Skills

- Problem Solving and Analytical Thinking
- Effective Communication and Presentation Skills
- Team Collaboration and Leadership
- Time Management and Task Prioritization
- Adaptability and Continuous Learning
- Critical Thinking and Decision Making
- Project Planning and Organization
- Attention to Detail

Technical Skills

Languages: Python, C (with Data Structures), C++, C#, Java, PHP.
Data Science Python Libraries: NumPy, Pandas.
Data Analysis Visualization: Power BI, MS Excel.
Tools Platforms: GitHub, Jupyter Lab, Anaconda, VS Code, IDLE, MS-Excel, MS Power BI.
Databases: MySQL (basic).
Development: Advance Web Development using HTML, CSS, JS(Data Analysis and Visualization).

Achievements

- **Tech Showcase:** Built a radar system with Arduino and an AI robot with speech system; exhibited in college tech fests.
- **Certifications:** Completed courses in HTML (Mindluster), Python for Data Science, and Java (Learntube).
- **Academic Excellence:** Consistently achieved high academic performance and ranked among top students in the class.
- **Solved 250+ coding problems:** Across platforms such as LeetCode.

Projects

AI-Driven Human Care System | *Python, Streamlit, Machine Learning, SQLite, GitHub*

- Engineered an AI-powered healthcare web application integrating ML-based Diabetes Prediction, Stress Monitoring, and Intelligent Habit Tracking with secure authentication and dynamic user profiling.

Advanced Student Performance Analytics Dashboard | *Power BI, Data Visualization, DAX, Data Modeling*

- Developed an interactive and data-driven Power BI dashboard leveraging data modeling and DAX to analyze academic performance trends, KPI metrics, and actionable insights for performance optimization.

SafeScan – AI-Based Threat Detection System | *Python, Scikit-learn, Pandas, PyQt5, ML, SQLite*

- Engineered an AI-powered desktop security system leveraging Machine Learning models to classify malicious files and suspicious URLs using feature extraction and pattern analysis, with real-time GUI alerts and structured logging.

Intelligent WhatsApp Automation System | *Python, NLP, Pandas, Scikit-learn, API Integration*

- Developed an AI-driven WhatsApp automation system utilizing NLP techniques and ML models for message classification, smart reply generation, and personalized communication workflows through data-driven insights.

Suyash College Management Portal | *PHP, MySQL, HTML, CSS, JavaScript*

- Developed a complete college management web application to manage academic and administrative activities.
- Implemented multiple role-based login systems including Admin, Office Staff, Employee, Student, and Library modules.
- Admin panel manages employee records, student data, attendance, salary management, and system configuration.
- Student portal provides access to personal profile, attendance records, notices, and academic information.
- Employee module allows staff to view their profile, salary details, attendance, and leave records.
- Library system manages book records, issuing, returning, and tracking student library activities.
- Office panel handles student admissions, record updates, and administrative tasks.
- Designed a responsive UI with dashboards, image sliders, notice boards, and dynamic data management using MySQL database.

AI-Based Predictive Modeling System | *Python, NumPy, Pandas, Scikit-learn*

- Developed a machine learning model leveraging Python, NumPy, and Pandas for data preprocessing, feature engineering, and high-accuracy predictive analytics.

Online Library Management System | *PHP, MySQL, HTML, CSS, JavaScript*

- Developed a web-based library management system to manage books, student records, and borrowing activities.
- Implemented role-based login for Admin and Students with secure authentication.
- Designed modules for book issue, return tracking, and overdue record management.
- Created an admin dashboard to manage books, users, and library transactions efficiently.
- Integrated MySQL database for storing and retrieving library data dynamically.

Sales Performance Analytics Dashboard | *Power BI, Excel, Data Visualization*

- Developed an interactive Power BI dashboard to analyze sales performance across different regions, products, and time periods.
- Created dynamic visualizations including KPI indicators, bar charts, and trend analysis to track revenue and growth.
- Used data transformation and cleaning techniques in Power Query to prepare raw datasets for analysis.
- Enabled business insights by identifying top-performing products, seasonal sales trends, and customer purchasing patterns.
